

EMERGENCY RESCUE SHEET

Micro Bird G5e 2025 to present

EMERGENCY SHUTDOWN PROCEDURE

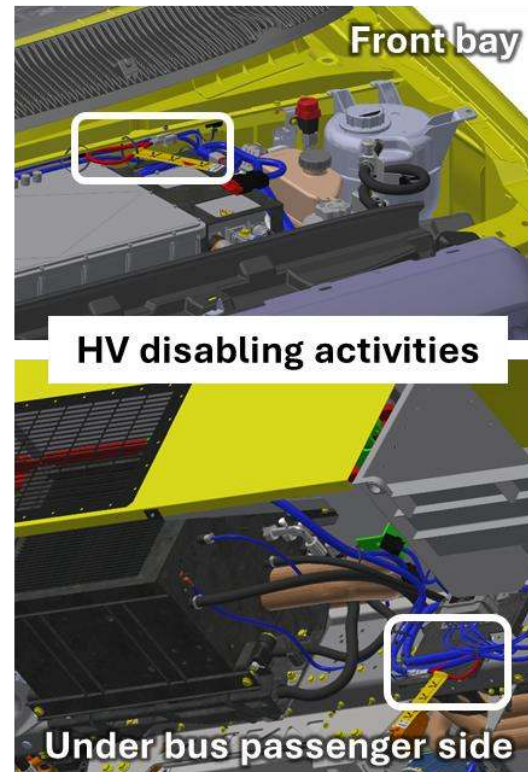

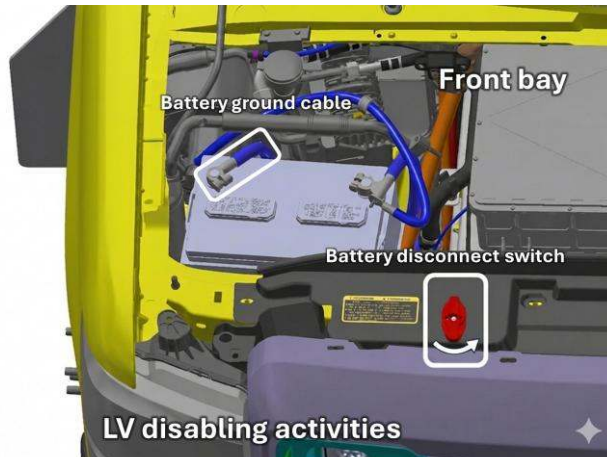

- 1 – Apply the parking brake
- 2 – Chock wheels (if possible)
- 3 – Turn OFF ignition and remove key (if possible)
- 4 – Cut / remove one of the First Responder Loops
- 5 – Turn OFF LV battery disconnect
or Cut / remove ground cable from LV battery

IF VEHICLE IS SUBMERGED

Evacuate the bus immediately and, if possible, remove the key from the ignition. Do not perform any disabling procedures until the bus has been fully removed from the water and completely drained.

VEHICLE FIRE

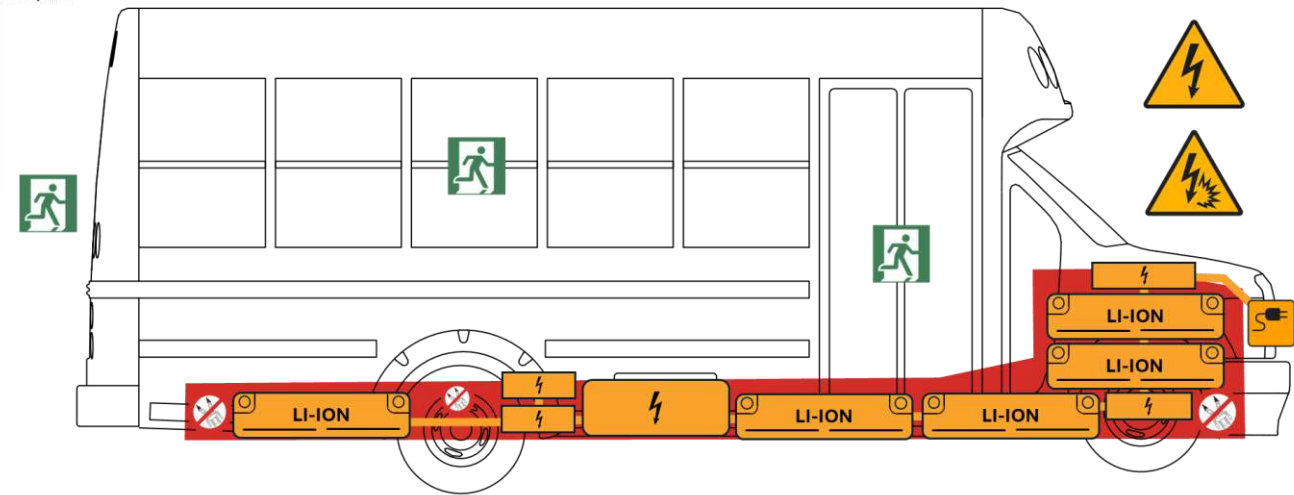

Evacuate the bus immediately. Perform the system emergency shutdown procedure (if possible). Follow standard first responder procedures. Use copious amounts of water to control a lithium battery fire.

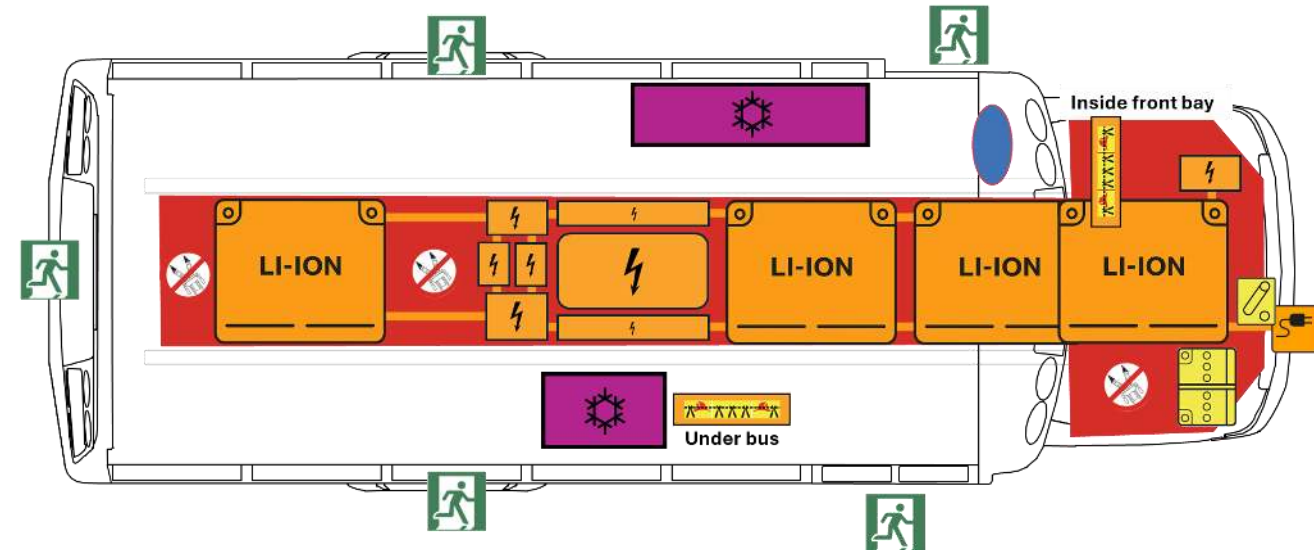

G5e
140 | 175

*Roof exit may not be present on all vehicles

Do NOT cut into or penetrate the region highlighted in red as High Voltage (HV) can be present at any time
