	High Voltage Battery Pack		High Voltage Power Cable		High Voltage Disconnect				Ultra Capacitor, High Voltage

GMC Sierra eAssist 4 Door Pick-up 2016

First Responder Rescue Sheet

The GMC Sierra with eAssist technology incorporates a low voltage battery that must be disconnected prior to occupant extrication.

To Disable the Vehicle:

1. Turn the ignition to "OFF" and remove the keys from the vehicle.
2. Double cut all low voltage cables marked by the yellow tape located above the battery on the right side of the engine compartment.

Do **NOT** cut any Orange colored High Voltage Cables.

 12V  120V	EMERGENCY PERSONNEL: To help avoid personal injury in an emergency, • Turn ignition to "Off". • Cut all positive cables connected at yellow tape (see diagram). SERVICE PERSONNEL: To help avoid personal injury during vehicle service, disconnect both battery locations (see diagram).	PERSONNEL AFFECTÉ AUX URGENCES : Afin d'éviter toute lésion personnelle, effectuer ce qui suit en cas d'urgence : • Mettre la clé de contact sur « Off » (arrêt). • Couper tous les câbles positifs connectés au niveau du ruban jaune (voir diagramme). PERSONNEL AFFECTÉ À L'ENTRETIEN : Afin d'éviter toute lésion personnelle pendant l'entretien du véhicule, déconnecter les deux emplacements de la batterie (voir diagramme).	PARA EVITAR LESIONES PERSONALES EN UNA EMERGENCIA: • Gire la ignición a "Off" (apagado). • Corte todos los cables positivos conectados en la cinta amarilla (vea el diagrama). PERSONAL DE SERVICIO: Para ayudar a evitar lesiones personales durante el servicio del vehículo, desconecte ambas ubicaciones de la batería (vea el diagrama).

Air Bag Caution

After disabling 12 volt power, wait at least 10 seconds to allow any un-deployed airbag reserve energy to dissipate.

In Case of Fire

A battery on fire will not explode. If battery cells reach high enough temperature, they vent and release electrolyte. Battery electrolyte is flammable. Use copious amounts of water to cool the battery to extinguish the fire. Do not use an ABC dry chemical extinguisher because it will not extinguish a battery fire.

In Case of Water Immersion

The high voltage battery is isolated from the vehicle chassis. If the vehicle is immersed in water, you will not be electrocuted by touching the vehicle.
