

## EWR D&I ANNOTATION

FAN-000001L093001DP129-4460

**Artemis # :** 000001L093001DP129

**Record Created Date :** 09/13/2010

**Printed Date :** 10/27/2010

**Description :** DI10-006. SEQ ID 129. 2009 Q3. VEHICLE IN QUESTION IS A 2007 CHEVY COBALT THAT WAS TRAVELLING ON THE HIGHWAY. POLICE REPORT STATES THAT THE DRIVER WAS TRAVELING TOO FAST FOR THE CONDITIONS AND TRIED NEGOTIATING A RIGHT HAND CURVE. THE VEHICLE STARTED TO ROTATE, WENT OFF THE ROAD, STRUCK A PHONE BOX, AND ROLLED. THE DRIVER WAS EJECTED DURING THE INCIDENT AND WAS KILLED. THE WIFE OF THE DRIVER SAYS THE AIR BAGS DID NOT DEPLOY AND SHOULD HAVE. THE VEHICLE WAS TOTALLED. THE PRE CRASH DATA SHOWS THE VEHICLE GOING ABOUT 42MPH BEFORE THE ACCIDENT, BUT THE MAXIMUM CHANGE IN VELOCITY WAS LESS THAN 11MPH. GM STATES THAT THEY WILL NOT HONOR THE REQUEST FOR DAMAGES. \*RM

Dear Ms. Kent:

The Office of Defects Investigation (ODI) of the National Highway Traffic Safety Administration (NHTSA) has received information about certain death and injury incidents reported by General Motors Corp. (GM) in its light early warning report from 3rd quarter of 2009. We are writing to request additional information about the following incidents:

| Selected Death and Injury Incidents                                                                                                                                                                                                                                                                                          |  |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| For Reporting Category: L                                                                                                                                                                                                                                                                                                    |  |
| For the following Sequence IDs: 6, 12, 13, 14, 15, 16, 17, 46, 47, 50, 60, 61, 93, 103, 105, 106, 115, 119, 129, 132, 135, 147, 161, 171, 185, 186, 187, 188, 189, 190, 192, 193, 194, 215, 231, 239, 242, 271, 278, 281, 297, 321, 326, 342, 344, 349, 350, 352, 355, 375, 384, 386, 450, 451, 452, 462, 467, 471, 478, 495 |  |

Unless otherwise stated in the text, the following definitions apply to these information requests:

**Incident:** each incident identified in the above table.

**Claim and Notice:** shall have the meanings stated in 49 CFR §579.4(c). Claim and notice also specifically refer to the claim(s) and notice(s) that are the predicate for the early warning report on the incident.

**Manufacturer:** refers to GM.

**Vehicle:** the vehicle produced by GM that is identified in the claim or notice.

**Tire:** the tire produced by GM that is identified in the claim or notice.

**Equipment:** the item of motor vehicle equipment produced by GM that is identified in the claim or notice.

**Defect:** means any failure, malfunction, lack of durability, or other problem in performance, construction, a component, or material of a motor vehicle or piece of motor vehicle equipment.

**Document:** “Document(s)” is used in the broadest sense of the word and shall mean all written, typed, graphic and photographic matter whatsoever (except autopsy photographs), be it in original, copy or electronic form. Any photograph originally produced in color must be provided in color and in electronic form, if possible. Furnish all documents whether verified by GM or not. If a document is not in the English language, provide both the original document and an English translation of the document. Document(s) includes all documents in GM’s custody and/or control.

Please provide numbered responses to the following inquiries, repeating the applicable request verbatim before each response. After GM’s response to each request, identify the source of the information and indicate the last date the information was gathered. When documents are produced, the documents shall be produced in an identified, organized manner that corresponds to each pertinent information request. A separate response must be provided for each incident. Each response, document or attachment must be clearly identified with the incident Sequence ID (SeqID) number.

1. Provide a complete copy of the initial claim or notice document(s) that notified GM of the incident, excluding: (a) medical documents and bills, except those showing the cause of death or injury; (b) property damage invoices or estimates; and (c) documents related to damages.
2. Provide a copy of the Police Accident Report.
3. At your option, provide GM’s assessment of the circumstances that led to the incident including GM’s analysis of the claim and/or notice regarding allegations of a defect.

If GM claims that any of the information or documents provided in response to this information request constitute confidential commercial material within the meaning of 5 U.S.C. § 552(b) (4), or are protected from disclosure pursuant to 18 U.S.C. § 1905, GM must submit supporting information together with the materials that are the subject of the confidentiality request, in accordance with 49 CFR Part 512, as amended (69 Fed. Reg. 21409 et seq; April 21, 2004), to the Office of Chief Counsel (NCC-110), National Highway Traffic Safety Administration, 1200 New Jersey Avenue, S.E., Washington, D.C. 20590. GM is required to submit two copies of the documents containing allegedly confidential information (except only one copy of blueprints) and one copy of the documents from which information claimed to be confidential has been deleted. Please remember that the words “CONFIDENTIAL BUSINESS INFORMATION” must appear at the top of each page containing information claimed to be confidential, and the information must be clearly identified in accordance with 5 U.S.C. § 512.6. If you submit a

request for confidentiality for all or part of your response to this letter, that is in an electronic format (e.g., CD-ROM), your request and associated submission must conform to the new requirements in NHTSA's Confidential Business Information Rule regarding submissions in electronic formats (49CFR 512.(c)). See Federal Register, volume 72, page 59434 (October 19, 2007).

Your response to this letter, together with a copy of any confidentiality request, must be submitted to this office by **August 6, 2010**. Please include in your response the identification codes referenced on page one of this letter. If you are unable to provide all of the information requested within the time allotted, you must request an extension from me at (202) 366-4238, no later than five business days before the response due date. If all of the information requested by the original deadline is unavailable, you must submit a partial response by the original deadline with whatever information then is available, even if an extension is granted.

If you have any technical questions concerning this matter, please contact Mr. Leo Yon at (202) 366-7028 or by fax at (202) 366-7882.

Sincerely,

A handwritten signature in black ink that reads "Christina Morgan". The script is cursive and fluid, with the first name and last name clearly distinguishable.

DI10-006

Dear Ms. Morgan:

This is General Motors' (GM) response to your inquiry dated July 6th, 2010 regarding certain death and injury incidents reported by GM in its light vehicle early warning report from the 3rd quarter of 2009.

GM's response is comprised of 62 disks for the incidents that are the subject of DI10-006.

Attachment "A" includes instructions for navigating the disk. Each disk, on its face, is identified by the NHTSA Sequence ID number, the Manufacturer's Unique ID number and the year, make and model of the vehicle involved in the incident, e.g., 6 48649735-678866 and 2009 BUICK ENCLAVE. When the disk is launched, this identification number appears again along with all of the documents on the disk (including photographs and videos, if applicable) listed under "Filename." The first document listed under Filename is an index with the Request and Responses, e.g., identified as 6 48649735-678866\_00\_**Request and Responses**. The index is numbered 1 through 3 to correspond to Inquiries 1 through 3, which are repeated verbatim below. The index also details whether any documents responsive to each inquiry were located.

For example, the Inquiry and Response in the index  
for the disk are as follows:

DI10-006  
6 48649735-678866  
2009 BUICK ENCLAVE

Request for Information:

1. **Provide a complete copy of the initial claim or notice document(s) that notified GM of the incident, excluding: (a) medical documents and bills, except those showing the cause of death or injury; (b) property damage invoices or estimates; and (c) documents related to damages.**

Response: See attached document.

2. **Provide a copy of the Police Accident Report.**

Response: See attached documents and photographs.

The remaining documents listed under Filename, reference the Manufacturer's Unique ID number along with the responsive Inquiry number. For example:

6 48649735-678866 **\_01\_001** - is the first document responsive to Inquiry no. 1.

6 48649735-678866 **\_02\_001** - is the first document responsive to Inquiry no. 2.

Your inquiries and our corresponding replies are as follows:

1. **Provide a complete copy of the initial claim or notice document(s) that notified GM of the incident, excluding: (a) medical documents and bills, except those showing the cause of death or injury; (b) property damage invoices or estimates; and (c) documents related to damages.**

Response: See attached document.

The table below lists the incident that is the subject of DI10-006, by Reporting Category, Sequence ID, VIN and type of notice received by GM (as "notice" is commonly used, not as it is defined by 49 C.F.R. §579.4(c)). Incidents reported on GM's Early Warning Report Death and Injury worksheet fall into four categories: Lawsuit (LIT), NISM (Not In Suit Matters), Product Allegation Resolution (PAR) or Rumor (RMR). Lawsuit and NISM case types generally meet the §579.4(c) definition of "claim." PAR cases, in this context, refer to customer contacts in which an injury or fatality is alleged to have occurred as a result of a product defect, and are accompanied by a writing that may or may not meet the §579.4(c) definition of "claim" or "notice." Rumor incidents do *not* involve a written or verbal, implied or express allegation of a defect by a customer. Rather, rumor cases generally refer to incidents that GM learned of through the media, which were subsequently investigated further.

2. **Provide a copy of the Police Accident Report.**

Response: If available, see attached document(s) and photograph(s) on the enclosed disk(s).

3. **At your option, provide GM's assessment of the circumstances that led to the incident including GM's analysis of the claim and/or notice regarding allegations of a defect.**

Response: GM opts not to respond.

GM claims that certain information, in documents that are part of rumor, claim and lawsuit files maintained by the GM Legal Staff and its outside counsel, is attorney work product and/or privileged. That information includes notes, memos, reports, photographs, and evaluations by attorneys (and by consultants, claims analysts, investigators and engineers working at the request of attorneys). GM is producing responsive documents from its rumor, claim and lawsuit files that are neither attorney work product nor privileged and withholding those that are attorney work product and/or privileged.

This response was compiled and prepared by this office upon review of documents retrieved by GM and does not include documents generated or received subsequent to the searches.

Please contact me at if you require further information.

Sincerely,

M. Carmen Benavides  
Director, Product Investigations  
and Safety Regulations

### *Instructions for using Disk Viewer*

1. Insert the disk into the disk ROM drive; the disk will open automatically.
2. Click the "Run JPegger" button on the pop up window.

3. The program will launch in the browsing mode, which is shown in the image below.
4. You can use the down arrow key on your keyboard to browse through the images.

5. Each image file may contain multiple pages. In the browsing mode use **Next Page Icon (Ctrl + PgDn)**, **Select Page Icon** or **Previous Page Icon (Ctrl + PgUp)** to browse through all of the pages within an image file. (Note: Some image files may contain up to 80 pages.)
6. By double-clicking on an image from the file list, a slide show will initiate, however, it will not automatically advance through the pages. Use **Ctrl + PgDn** or **Ctrl + PgUp** to browse through all of the pages within an image file. Left-clicking on an image, while in the slide show mode, will advance to the first page of the next image file.
7. Right click on the image to see the image properties, as shown below. Image properties can also be used to view each page within the documents (Next Page), or to view the next document within the file list (Next Image).
8. If the image is difficult to view, the scale may be changed. Use **F5**, **F6**, **F7** and **F8** to alternate between scales that fit the screen, or are 50%, 100%, and 200% of the image's original size.

The screenshot shows a legal document cover sheet titled "CIVIL CASE COVER SHEET" for the Superior Court of the State of California, Indio County. The case is titled "V. CHEVROLET". The document includes various checkboxes for case type, complexity, and remedies. Annotations with arrows point to specific features:

- Step 7: Next File (Image)**: Points to the "Next Image" button in the right-hand navigation pane.
- Step 7: Next Page**: Points to the "Next page" button in the right-hand navigation pane.
- Step 8: Scale Image**: Points to the "Scale" dropdown menu in the right-hand navigation pane, which is currently set to "Fit Scale to fit".
- Step 7: Image Properties**: Points to the "Image Properties" button at the bottom of the right-hand navigation pane.

The cover sheet itself contains the following information:

- Case Name**: V. CHEVROLET
- Civil Case Cover Sheet**: Limited ☐ Unlimited ☒
- Complex Case Designation**: Complex ☐ Simple ☒
- Case Number**: 009-469-5126

- Date:** JULY 3, 2009
- ERIC D. PARIS, ESQ., S/B# 147836**

**NOTICE**

- Plaintiff must file this cover sheet with the first paper filed in the action or proceeding (see under the Probate, Family, or Welfare and Institutions Code) (Cal. Rules of Court, rule 1800).
- This cover sheet is in addition to any cover sheet required by local court rules.
- If this case is complex under rule 1800 of the California Rules of Court, you must attach this to the action or proceeding.
- When this is a complex case, this cover sheet shall be used for statistical purposes only.

**CIVIL CASE COVER SHEET**

**DI10-006**  
**129 48649657 – 678717**  
**2007 CHEVROLET COBALT**

**Request for Information:**

1. Provide a complete copy of the initial claim or notice document(s) that notified GM of the incident, excluding: (a) medical documents and bills, except those showing the cause of death or injury; (b) property damage invoices or estimates; and (c) documents related to damages.

Response: See Attached Document.

2. Provide a copy of the Police Accident Report.

Response: See Attached Document.

3. At your option, provide GM's assessment of the circumstances that led to the incident including GM's analysis of the claim and/or notice regarding allegations of a defect.

Response: See Attached Document. Assessments of claims may be attorney work product and/or privileged. Therefore, information and documents provided in this response, if any, consist only of non-attorney work product and/or non-privileged material for incidents that have been investigated and assessed.

Comments

Cust Sts:

-my husband was going around the curb and the car rolled and either of the airbag deployed and it killed my husband  
-2007 Cobalt and i dont have the papers here...am at work and everything is in the house  
-it happened last Aug 9, 2009

Cust Sks:

-why airbag did not deploy

Crs Advsd:

-informed cust that CRS will document concern but need all the info like VIN, Police report # and insurance claim # before file can be forwarded to PAR  
-provided cust the SR #

Cust Sts:

-ill call later when i arrive home  
-thank you

Johanna\_Reyes/CAC/T1/LVL1/Mla.

RE: Claimant: [REDACTED]  
Our File No.: 678717  
Our Client: General Motors Company  
Date/Event: 8-09-09  
Vehicle: 2007 Chev. Cobalt  
VIN: 1G1AK55F677 [REDACTED]

Dear Stephanie:

This will confirm that we have completed our review of your claim regarding your 2007 Chev. Cobalt. At this time, based on all documentation received and reviewed, ESIS, on behalf of General Motors Company, will not be in a position to honor your request for damages. If you have any additional evidence that supports your claim of a product defect, please forward it to my attention for further review.

Also, you have an obligation and responsibility to ensure that the subject vehicle and its related components are maintained and preserved in their immediate post-incident condition for as long as you intend to pursue a claim and/or cause of action.

Sincerely,

Annette Rigdon  
Claims Administrator

| Reported with CDR version  | Crash Data Retrieval Tool 3.3          |
| EDR Device Type            | airbag control module                  |
| Event(s) recovered         | Non-Deployment                         |

**IMPORTANT NOTICE:** Robert Bosch LLC recommends that the latest production release of Crash Data Retrieval software be utilized when viewing, printing or exporting any retrieved data from within the CDR program. This ensures that the retrieved data has been translated using the most recent information including but not limited to that which was provided by the manufacturers of the vehicles supported in this product.

## Data Limitations

### Recorded Crash Events:

There are two types of recorded crash events. The first is the Non-Deployment Event. A Non-Deployment Event records data but does not deploy the air bag(s). The minimum SDM Recorded Vehicle Velocity Change, that is needed to record a Non-Deployment Event, is five MPH. A Non-Deployment Event may contain Pre-Crash and Crash data. The SDM can store up to one Non-Deployment Event. This event can be overwritten by an event that has a greater SDM recorded vehicle velocity change. This event will be cleared by the SDM, after approximately 250 ignition cycles. This event can be overwritten by a second Deployment Event, referred to as Deployment Event #2, if the Non-Deployment Event is not locked. The data in the Non-Deployment Event file will be locked, if the Non-Deployment Event occurred within five seconds of a Deployment Event. A locked Non Deployment Event cannot be overwritten or cleared by the SDM.

The second type of SDM recorded crash event is the Deployment Event. It also may contain Pre-Crash and Crash data. The SDM can store up to two different Deployment Events. If a second Deployment Event occurs any time after the Deployment Event, the Deployment Event #2 will overwrite any non-locked Non-Deployment Event. Deployment Events cannot be overwritten or cleared by the SDM. Once the SDM has deployed an air bag, the SDM must be replaced.

### Data:

-SDM Recorded Vehicle Velocity Change reflects the change in velocity that the sensing system experienced during the recorded portion of the event. SDM Recorded Vehicle Velocity Change is the change in velocity during the recording time and is not the speed the vehicle was traveling before the event, and is also not the Barrier Equivalent Velocity. For Deployment Events, the SDM will record 220 milliseconds of data after deployment criteria is met and up to 70 milliseconds before deployment criteria is met. For Non-Deployment Events, the SDM can record up to the first 300 milliseconds of data after algorithm enable. Velocity Change data is displayed in SAE sign convention.

-The CDR tool displays time from Algorithm Enable (AE) to time of deployment command in a deployment event and AE to time of maximum SDM recorded vehicle velocity change in a non-deployment event. Time from AE begins when the first air bag system enable threshold is met and ends when deployment command criteria is met or at maximum SDM recorded vehicle velocity change. Air bag systems such as frontal, side, or rollover, may be a source of an enable. The time represented in a CDR report can be that of the enable of one air bag system to the deployment time of another air bag system.

-Maximum Recorded Vehicle Velocity Change is the maximum square root value of the sum of the squares for the vehicle's combined "X" and "Y" axis change in velocity.

-Event Recording Complete will indicate if data from the recorded event has been fully written to the SDM memory or if it has been interrupted and not fully written.

-SDM Recorded Vehicle Speed accuracy can be affected by various factors, including but not limited to the following:

- significant changes in the tire's rolling radius
- final drive axle ratio changes
- wheel lockup and wheel slip

-Brake Switch Circuit Status indicates the open/closed state of the brake switch circuit.

-Pre-Crash data is recorded asynchronously.

-Pre-Crash Electronic Data Validity Check Status indicates "Data Invalid" if:

- the SDM receives a message with an "invalid" flag from the module sending the pre-crash data
- no data is received from the module sending the pre-crash data
- no module is present to send the pre-crash data

- Driver's and Passenger's Belt Switch Circuit Status indicates the status of the seat belt switch circuit, except: The Passenger Belt Switch Circuit Status for 2005 vehicles is available only on the Cadillac STS. The Passenger Belt Switch Circuit Status for 2006 Chevrolet Cobalt Sport Coupe (AP) model vehicles, with the option package that includes Recaro brand seats (RPO ALV), always reports a default value of "Buckled," because there is no passenger belt switch with the Recaro seat option.
- The Time Between Non-Deployment to Deployment Events is displayed in seconds. If the time between the two events is greater than five seconds, "N/A" is displayed in place of the time. If the value is negative, then the Deployment Event occurred first. If the value is positive, then the Non-Deployment Event occurred first.
- If power to the SDM is lost during a crash event, all or part of the crash record may not be recorded.
- The ignition cycle counter relies upon the transitions through OFF->RUN->CRANK power-moding messages, on the GMLAN communication bus, to increment the counter. Applying and removing of battery power to the module will not increment the ignition counter.
- Steering Wheel Angle data is displayed as a positive value when the steering wheel is turned to the right and a negative value when the steering wheel is turned to the left, except for Cadillac STS model vehicles with StabiliTrak 3.0 systems (RPO JL7). For Cadillac STS model vehicles with StabiliTrak 3.0 systems (RPO JL7), when the steering wheel is turned to the right, a negative value will be displayed and when the steering wheel is turned to the left, a positive value will be displayed. The Steering Wheel Angle data is reported in 16 degree increments.

Data Source:

All SDM recorded data is measured, calculated, and stored internally, except for the following:

- Vehicle Status Data (Pre-Crash) is transmitted to the SDM, by various vehicle control modules, via the vehicle's communication network.
- The Belt Switch Circuit is wired directly to the SDM.

### Multiple Event Data

|                                                         |     |
|---------------------------------------------------------|-----|
| Associated Events Not Recorded                          | 2   |
| An Event(s) Preceded the Recorded Event(s)              | Yes |
| An Event(s) was in Between the Recorded Event(s)        | No  |
| An Event(s) Followed the Recorded Event(s)              | Yes |
| The Event(s) Not Recorded was a Deployment Event(s)     | No  |
| The Event(s) Not Recorded was a Non-Deployment Event(s) | Yes |

### System Status At AE

|                                              |             |
|----------------------------------------------|-------------|
| Vehicle Identification Number                | **1AK55F*7* |
| Low Tire Pressure Warning Lamp (If Equipped) | Invalid     |
| Vehicle Power Mode Status                    | Run         |
| Remote Start Status (If Equipped)            | Inactive    |
| Run/Crank Ignition Switch Logic Level        | Active      |
| Brake System Warning Lamp (If Equipped)      | OFF         |

### System Status At 1 second

|                                                   |         |
|---------------------------------------------------|---------|

## Hexadecimal Data

Data that the vehicle manufacturer has specified for data retrieval is shown in the hexadecimal data section of the CDR report. The hexadecimal data section of the CDR report may contain data that is not translated by the CDR program. The control module contains additional data that is not retrievable by the CDR system.

**IMPORTANT NOTICE:** Robert Bosch LLC recommends that the latest production release of Crash Data Retrieval software be utilized when viewing, printing or exporting any retrieved data from within the CDR program. This ensures that the retrieved data has been translated using the most recent information including but not limited to that which was provided by the manufacturers of the vehicles supported in this product.

## Data Limitations

### Recorded Crash Events:

There are two types of recorded crash events. The first is the Non-Deployment Event. A Non-Deployment Event records data but does not deploy the air bag(s). The minimum SDM Recorded Vehicle Velocity Change, that is needed to record a Non-Deployment Event, is five MPH. A Non-Deployment Event may contain Pre-Crash and Crash data. The SDM can store up to one Non-Deployment Event. This event can be overwritten by an event that has a greater SDM recorded vehicle velocity change. This event will be cleared by the SDM, after approximately 250 ignition cycles. This event can be overwritten by a second Deployment Event, referred to as Deployment Event #2, if the Non-Deployment Event is not locked. The data in the Non-Deployment Event file will be locked, if the Non-Deployment Event occurred within five seconds of a Deployment Event. A locked Non-Deployment Event cannot be overwritten or cleared by the SDM.

The second type of SDM recorded crash event is the Deployment Event. It also may contain Pre-Crash and Crash data. The SDM can store up to two different Deployment Events. If a second Deployment Event occurs any time after the Deployment Event, the Deployment Event #2 will overwrite any non-locked Non-Deployment Event. Deployment Events cannot be overwritten or cleared by the SDM. Once the SDM has deployed an air bag, the SDM must be replaced.

### Data:

-SDM Recorded Vehicle Velocity Change reflects the change in velocity that the sensing system experienced during the recorded portion of the event. SDM Recorded Vehicle Velocity Change is the change in velocity during the recording time and is not the speed the vehicle was traveling before the event, and is also not the Barrier Equivalent Velocity. For Deployment Events, the SDM will record 220 milliseconds of data after deployment criteria is met and up to 70 milliseconds before deployment criteria is met. For Non-Deployment Events, the SDM can record up to the first 300 milliseconds of data after algorithm enable. Velocity Change data is displayed in SAE sign convention.

-The CDR tool displays time from Algorithm Enable (AE) to time of deployment command in a deployment event and AE to time of maximum SDM recorded vehicle velocity change in a non-deployment event. Time from AE begins when the first air bag system enable threshold is met and ends when deployment command criteria is met or at maximum SDM recorded vehicle velocity change. Air bag systems such as frontal, side, or rollover, may be a source of an enable. The time represented in a CDR report can be that of the enable of one air bag system to the deployment time of another air bag system.

-Maximum Recorded Vehicle Velocity Change is the maximum square root value of the sum of the squares for the vehicle's combined "X" and "Y" axis change in velocity.

-Event Recording Complete will indicate if data from the recorded event has been fully written to the SDM memory or if it has been interrupted and not fully written.

-SDM Recorded Vehicle Speed accuracy can be affected by various factors, including but not limited to the following:

- significant changes in the tire's rolling radius
- final drive axle ratio changes
- wheel lockup and wheel slip

-Brake Switch Circuit Status indicates the open/closed state of the brake switch circuit.

-Pre-Crash data is recorded asynchronously.

-Pre-Crash Electronic Data Validity Check Status indicates "Data Invalid" if:

- the SDM receives a message with an "invalid" flag from the module sending the pre-crash data
- no data is received from the module sending the pre-crash data

1G1AK55F677178479

-no module is present to send the pre-crash data

-Driver's and Passenger's Belt Switch Circuit Status indicates the status of the seat belt switch circuit, except: The Passenger Belt Switch Circuit Status for 2005 vehicles is available only on the Cadillac STS. The Passenger Belt Switch Circuit Status for 2006 Chevrolet Cobalt Sport Coupe (AP) model vehicles, with the option package that includes Recaro brand seats (RPO ALV), always reports a default value of "Buckled," because there is no passenger belt switch with the Recaro seat option.

-The Time Between Non-Deployment to Deployment Events is displayed in seconds. If the time between the two events is greater than five seconds, "N/A" is displayed in place of the time. If the value is negative, then the Deployment Event occurred first. If the value is positive, then the Non-Deployment Event occurred first.

-If power to the SDM is lost during a crash event, all or part of the crash record may not be recorded.

-The ignition cycle counter relies upon the transitions through OFF->RUN->CRANK power-moding messages, on the GMLAN communication bus, to increment the counter. Applying and removing of battery power to the module will not increment the ignition counter.

-Steering Wheel Angle data is displayed as a positive value when the steering wheel is turned to the right and a negative value when the steering wheel is turned to the left, except for Cadillac STS model vehicles with StabiliTrak 3.0 systems (RPO JL7). For Cadillac STS model vehicles with StabiliTrak 3.0 systems (RPO JL7), when the steering wheel is turned to the right, a negative value will be displayed and when the steering wheel is turned to the left, a positive value will be displayed. The Steering Wheel Angle data is reported in 16 degree increments.

Data Source:

All SDM recorded data is measured, calculated, and stored internally, except for the following:

-Vehicle Status Data (Pre-Crash) is transmitted to the SDM, by various vehicle control modules, via the vehicle's communication network.

-The Belt Switch Circuit is wired directly to the SDM.

**Ignition Data**

| Data Location       | Data Value (Hex) | Parameter Descriptor             | Translated Value | Units  |
