

FCEV Vehicle Emergency

Are you a First
Responder?

YES

Is there a fire?

NO

**ORANGE CABLES DESIGNATE HIGH VOLTAGE LINES
– 650v**

**KEY-OFF OR 12V/24V CUT SHUTS HYDROGEN AND
BATTERY SYSTEMS OFF**

YES

Clear the area around the vehicle and spray a large amount of water to the truck from a safe distance. Make sure no re-ignition after the fire is put out.

If battery wire harness is ignited or fired, use carbon dioxide or dry powder fire extinguisher

If battery catches fire, use a high pressure water gun to extinguish fire far away from the vehicle, Let battery burn itself out if difficult to apply large amount of water

Do not spray water onto the hydrogen storage system if it's already engulfed in flames. Allow TRD to blow

If people accidentally inhale smoke, please transfer and seek medical attention as soon as possible

It is forbidden to use the vehicle again before a Hyzon Motors professional evaluates vehicle and battery safety

Suspected
hydrogen leak?

YES

Listen for hissing sound of a gas leak

Avoid using equipment that can create a spark

Use a thermal imaging camera if fire is suspected to locate

Follow the Hydrogen Storage System purge procedure

NO

Turn off ignition

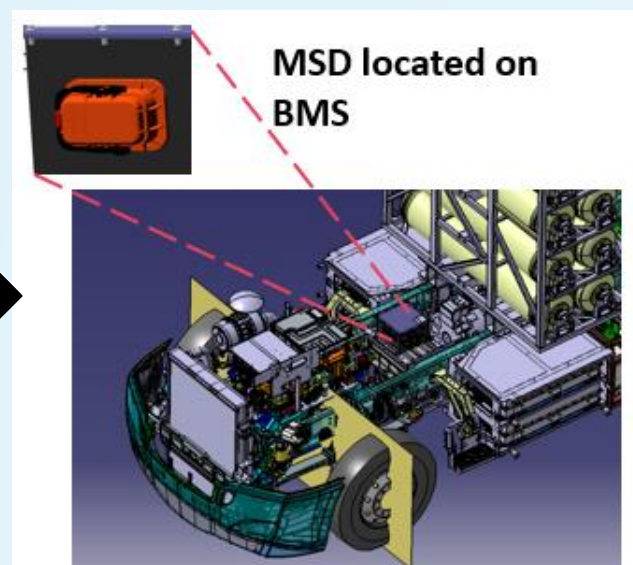

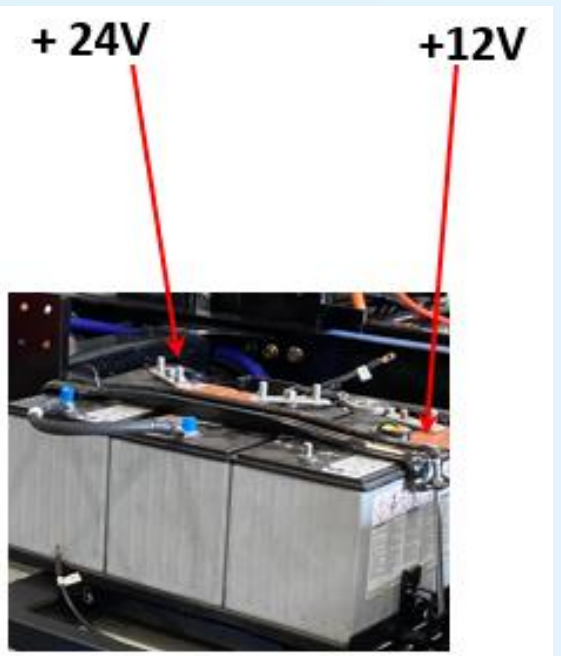

Only if condition permits, disconnect the positive cables from the 24 Volt and the 12 Volt batteries at the driver side

Cut negative battery cables if emergency switch or ignition cannot be reached

Remove MSD emergency switch

Open doors and hood
