

RESCUE SHEET

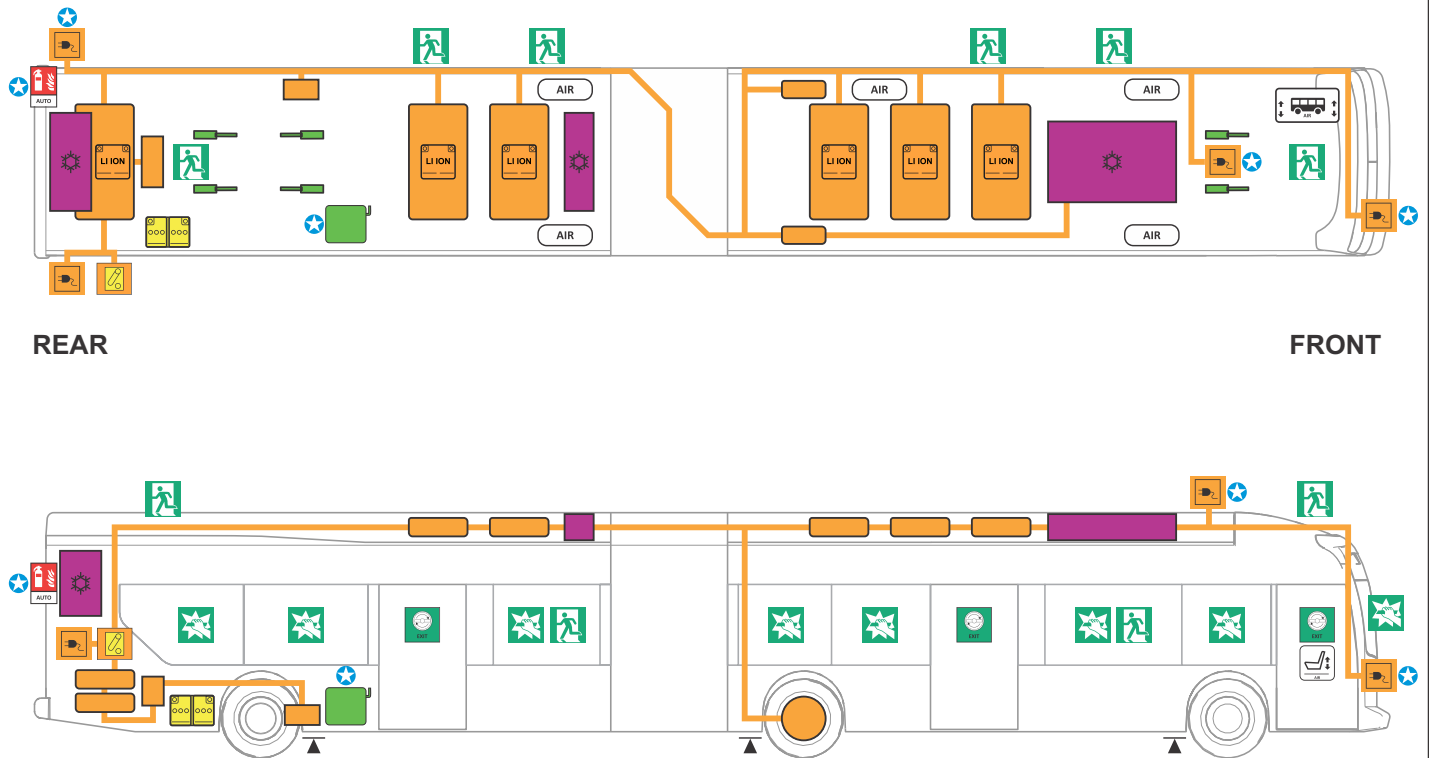

For an

XE60

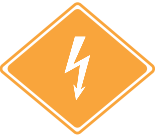

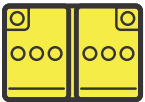

Xcelsior Electric
Transit Bus

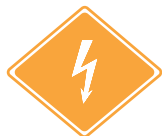

0. RESCUE SHEET

Note: Typical configuration of emergency exits and rooftop components are shown. Number of exits and locations may vary. Optional components marked by this symbol .

						
Electric Propulsion	Low Voltage Battery	Plug-in Charge Port	High Voltage Li-ion Battery	Disconnect High Voltage	High Voltage Component	Automatic Fire Suppression
						
High Voltage Power	Emergency Exit	Break To Obtain Access	Emergency Door Opener	Lifting Point	Air Conditioning	Fuel Tank
						
	Height Adjustment	Seat Adjustment	Air Tank	Preloaded Spring		

1. IDENTIFICATION / RECOGNITION

Electric Propulsion

2. IMMOBILIZATION / STABILIZATION / LIFTING

Kneel switch located in driver's area

Seat height adjustment on driver's seat

Lift points

3. DISABLE DIRECT HAZARDS / SAFETY REGULATIONS

Shut down high voltage

4. ACCESS TO THE OCCUPANTS

Three exit doors

Note: Typical configuration shown. Placement may vary.

Two roof hatch exits, six emergency window exits

Note: Typical configuration shown. Quantity and placement of exits may vary.

Break windows to obtain access

Steering wheel tilt control on steering column

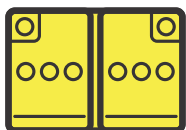

Seat height adjustment on driver's seat

Longitudinal seat adjustment on driver's seat

5. STORED ENERGY / LIQUIDS / GASES / SOLIDS

6. IN THE EVENT OF A FIRE

7. IN CASE OF SUBMERSION
